VeriCHECK SelfKiosk

The seamless self-service pre-registration border control system

www.veridos.com

A seamless system for smooth immigration

Enhance and speed up your border migration processing with the VeriCHECK SelfKiosk. Featuring self-service pre-registration, this EES compliant border control system helps immigration authorities provide a near seamless system that's easy to use by all travelers. The advanced biometric units capture the user's data in seconds enabling fast processing.

By adopting a modular design approach, Veridos has ensured that the VeriCHECK SelfKiosk can incorporate a choice of devices/biometric units and thus meet the specific needs of the customer, including integration with internal as well external back-end databanks where required.

| KEY ADVANTAGES

The VeriCHECK SelfKiosk is a cornerstone of Veridos' comprehensive suite of Border Control Solutions. Its features include:

- A unique, elegant and ergonomic design
- A camera that automatically adjusts to the height of the users faces – including wheelchair users
- An integrated camera and illumination that ensures the capture of high quality face images along with reliable presentation attack detection (PAD) features
- Secure verification of ICAO compliant travel documents and background (passports and ID cards) checks
- Verification of fingerprint images, including PAD features
- Interactive GUI for user guidance on touch display
- Integrated LEDs indication on device to convey the operational status of the kiosk
- Compact footprint that makes it easy to install
